- Team Development
- Team and project documentation

Team Development

- Being part of the team – psychology
- Single Repository and multiple developers
- TortoiseSVN

Being part of the team – psychology

Team is valued not only for the qualified developers in it, but also for the ability of those developers to work together on a single project.

Team means “Complex Workflow”

Common principles

- Team sense comes with the time
- Development is good, team development is just better
- Nothing should stop the development
- Shared knowledge speeds up the entire team
- Shared effort speeds up the entire development effort

Being part of the team – psychology

Questions?

Single Repository and multiple developers

- Common commit mistakes:
 - Commit with missing files
 - Lost somebody's files
 - Partial commit – when the build breaks
 - SQL specific – script should run on SQL 2000 and SQL 2005

TortoiseSVN

- How does it work?
- Terminology
 - Working copy
 - Repository
 - Commit
 - Update

TortoiseSVN

- Common commands
 - Check for modifications
 - Diff
 - Blame
 - Merge
 - Revert
 - Cleanup
 - Export

TortoiseSVN

Questions?

Present

- Team Development
- Team and project documentation

Team and project documentation

- ScrewTurn Wiki
 - What it is?
 - What was it designed for?
 - How are we going to use ScrewTurn?
 - ScrewTurn Syntax
 - Common principle – do like it is

Team and project documentation
